EARTHQUAKE PLAYED PING-PONG WITH

MAN-OF-WAR Earthquakes play queer pranks. Recent seismic disturbances in Italy have attracted renewed attention to Paul's" was made during the war. And England's esteem for the historic edithis phenomenon, and recall an amazice was shown by the continuation of ing incident in the annals of the Amerestoration work throughout the war ican navy in which a United States despite the interruption to practically man-of-war was carried on the crest of a tidal wave three miles up the coast, two miles inland, and set down, entirely unharmed, within a hundred ed by royalty and distinguished Amer-

feet of the Andes. This thrilling incident is recounted in a communication to the National Geographic society by one of the participants, Rear Admiral L. G. Billings, U. S. N., retired, as follows:

"In 1868 I was attached to the U.S. S. Wateree, then on duty in the South Pacific-one of a class of periods, because it is not the product boats built at the close of the Civil war to ascend the narrow, tortuous rivers of the South; she was termed with the structure as it stands toa 'double ender,' having a rudder at lay, but he embodied many features each end, and was quite flat-bottomed. of the famous "Old St. Paul's," razed a conformation which, while it did not n the great London fire of 1666. Wren add to her sea-going worthiness, endid not wish the restoration to be after the "Gothick Rudeness of the old Decrew, and eventually saved our lives sign." "From this moment the sea seemed to defy the laws of nature. Currents were borne here and there with a speed we could not have equaled had we been steaming for our lives. At irregular intervals the earthquake shocks recurred, but none of them so violent

or long continued as the first. "About 8:30 p. m. the lookout hailed the deck and reported a breaker approaching. Looking seaward, we saw, first, a thin line of phosphorescent light, which loomed higher and higher until it seemed to touch the sky; its crest, crowned with the death light of phosphorescent glow, showing the sul-

len masses of water below. "With a crash our gallant ship was overwhelmed and buried deep beneath a semi-solid mass of sand and water. For a breathless eternity we were submerged, groaning in every timber, the stanch old Wateree struggled again to the surface, with her gasping crew still clinging to the life-lines-some few seriously wounded, bruised and battered; none killed; not one even missing. A miracle it seemed to us then, and as I look back through the

years it seems doubly miraculous now. "The morning sun broke on a scene of desolation seldom witnessed. We found ourselves high and dry in a little cove, or rather indentation, in the coast line. We had been carried some three miles up the coast and nearly two miles inland. The wave had carried us over the sand dunes bordering the ocean, across a valley and over the railroad track, leaving us at the foot of the seacoast range of the Andes. On the nearly perpendicular front of the mountain our navigator discovered the marks of the tidal wave, and, by measgrements, found it to have been 47 feet high, not including the comb. Had the wave carried us 200 feet farther we would inevitably have been dashed to

pieces against the mountainside."

CHINA'S HOLY PLACES the much discussed Shantung, are detion to the National Geographic society

by Frederick McCormick: "Coleridge could not have selected a phrase more apt than 'stately pleasure dome' had he intended to call attention to the best-known form in Chinese architecture. Like so much of the wrought beauty of China, such as is still seen in parks and gardens, pagodas are the work of the Buddhist church almost exclusively.

"The most beautiful specimens are in the Yangtse valley, where pagodas are most numerous. Every important Chinese and Manchurian city is garlanded with them From the walls of Peking a dozen pagodas and towers may be counted within the city, and with a good glass half a dozen famous ones may be seen rising from the surrounding plain.

"Pagodas range in height from 20 to more than 200 feet, and are of various shapes-round, square, hexagonal, octagonal, etc. They always have an odd number of stories, ranging usually from seven to nine, and sometimes possessing 11 and even 13.

"The Chinese have appropriated the pagoda as a counterpoise to evil, and used it, subject to their rules of geometry.

"At the city of Tung, in the Peking plain, a region in past years visited by earthquakes, there is a prominent pagoda which at one time had more than 1,000 bronze bells suspended from its cornices, most of which are still in place. The people have this abled her to carry a large battery and story as to its construction: A water fowl lives underground at this place and when he shakes his tall it causes earthquakes. Geomancers located the end of his tail, and the pagoda was built on it to hold it down. Arica, whither we had towed the old At the same time this did not prevent the water fowl from winking his eye: but, as his evelids have not been accurately located, a second pagoda has not yet been built. As a result, tremblings of the earth still occur.

"The wonder inspired in the breast of the traveler who visits China's vast remains of abandoned capitals, extensive temples ranged in successive when we were startled by a violent | courts and on terraces of mountains, trembling of the ship, similar to the its pagodas, p'ai-lous, bridges, and effect produced by letting go the canals, is equaled by the awe inspired by the silent splendor of the tombs we ran on deck. Looking shoreward, of China's emperors. The tombs of the kings of the 'Six Kingdoms' in Roman shrine of Diana. MARKETING.

"It is surprising," said Mr. Robin, "how many creatures forget that they're not the only ones who go mar-

"Ladies go to the shops and the? think they're the only ones who see not at all. Of course they are most important and so are their families, and I wouldn't say they weren't, for

"But still, others go to the markets too, even though they may not all go to the same ones. And it is a good "Now, all of the robins go a-mar-

keting. We Robins are very good

at it. And most of the gentlemen birds do the marketing when the mother birds are watching over the eggs and the little birdlings." "That is so," agreed Mrs. Robin, the dear father birds are splendid about looking after the food for the me when we're busy guarding the the nests and seeing that the eggs

"And you always know where to get the best worms." "To be sure," said Mr. Robin, "and that is what I meant when I said that though we did not go to the same markets as people we went marketing,

hatch out into dear little birdlings.

"What a horrible thing it would be f people did come to the lawns and egan digging up all the worms! Gracious, the poor birds would have dreadful time!

"But they don't do that any more than we go to the grocery stores and tell the grocer to please do us up a package of potatoes and another of onions, and one more of meat which we'd order at the meat shop.

"It is fair the way things are dicided up. The robins have their places where they market. The rabbits have theirs, though they are quite fond of things that the groups-ups, the people, have, such as carrots and lettuce. They love lettuce and they adore carrots!

"But they're also fond of clover and people do not eat clover.

"Then there are many of the birds who eat the insects and bugs which

To Get the Best Worms.

the people do not want around which would destroy the trees. We help,

"So when such birds are marketing hey are not only taking what people lo not want and get what they do want for their meals, but they are taking something which people are very glad to get rid of.

"That is why many people see that we are looked after in the summer when it is hot by giving us water and in the cooler weather by giving us crumbs when food is harder to get. "They say that they do that to re-

ward us for the work we do for them. That's a nice thought, isn't it? "And then there are many other anlmals who all go marketing but they all have different markets where they go, such as the bears who love berries which they find in the woods and so those are their best markets,

"Every animal, every bird, every reature must go to market or have some one go to market for them, for every creature must live, and we have to eat to live."

"Did you just find that out, Mr. Robin?" asked Mrs. Robin. She chuckled, and Mr. Robin came up and hopped along beside her. "Making fun of your little mate,

"Not a bit of it," said Mrs. Robin, "just joking and having a little fun. But you're right. Sometimes people do think they're the only ones who go to market and who have to see about feeding their families.

"Gracious, I don't believe there is a creature who doesn't have to marketthat is, as you say, someone in each family must do the marketing, at least one person must.

"It is the same, too, as you say, among the animals and the birds and the people, among the fish and the fowls, and the creatures who are big and the creatures who are small."

"Yes," said Mr. Robin, "marketing is something we all do but a good many of us care for different kinds of things to eat-which is-as I have said extremely lucky; yes, extremely lucky. In this way the lawns don't run short of worms as they otherwise might do."

One Requirement Met. One Dickie Galton, of an Ohio town, being an orphan, resided with

one of his grandmothers. Her hobby was cleanliness, and she was forever lecturing the lad as to cleaning his teeth before he went to bed. On one occasion, when Dickie was visiting his other grandmother, who, unhappily for him, was afflicted with another kind of mania, he replied, when she asked him, "Dickie, have you read your Bible before going to bed?" "No, grandmother, but I have

cleaned my teeth." Some Rooster! An Englishman was once persuaded o see a game of baseball, and during

CASCARETS

"They Work while you Sleep"

Do you feel all "unstrung?"-billious, constipated, headachy, full of cold1 Cascarets tonight for your liver and bowels will have you tuned up by tomorrow. You will wake up with breath sweet, and skin rosy. No griping-no inconvenience. Children love Cascarets too. 10, 25, 50 cents .- Adv.

GIVING NATURE FAIR CHANCE

Sluggard Satisfied He Had an Admirable Excuse for Refusing to Be

Up and About "Arise!" we said in a tone admirably adapted for declamatory purposes, iddressing the sluggard, who was still slugging at an unconscionably late hour. "The lark is up to meet the sun. The bee is on the wing. Remember My young brother Billie was mis- the manner in which the experienced them 'double-o' or whatever they might be, instead of 'o,' 'o.' So he sternly recited, but 'Double up, Lucy! The sun is in the sky,' and so forth.

Why do you not double up, and to your tasks away?" "That is a very good story," replied the sluggard, "but it does not move "C'm in," he said, and I scrambled me. We are told that nature does most of her repair work on us while we are in bed. It is my intention o

"Why do the lawyers try so much hot air on witnesses?"

"Because they want to pump them." Female pickpockets are rare. No husband's.

When a married man falls down-It is rough on a man when love ou

stairs, he is sure to blame his wife for measles attacks him late in life.

If you like the taste of coffee, you'll like INSTANT POSTUM

and you'll like it better than coffee because it is a table drink of satisfying flavor, with no after regrets, and it costs less.

Coffee disagrees with some, but Instant Postum agrees with everybody.

'There's a Reason' for POSTUM

Sold by grocers everywhere!
